

MentorHub

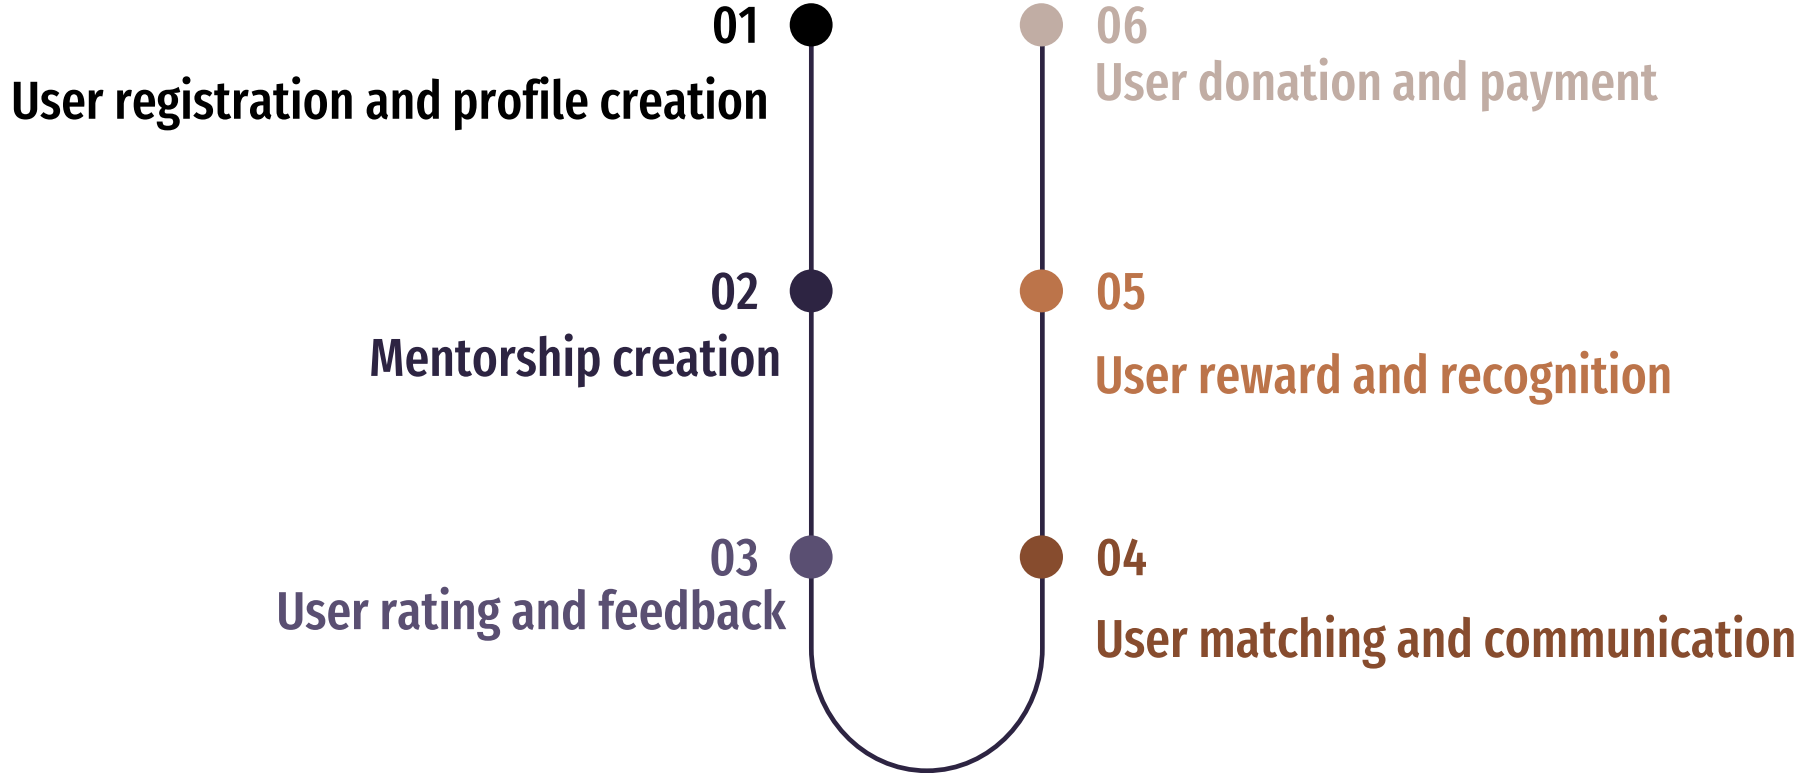

Mentorship website

Definition of the problem

Did you know that 75% of people who seek mentorship online are not satisfied with their experience? They face challenges such as finding the right mentor or mentee, communicating effectively, scheduling sessions, and tracking their progress. That's why we created Project Mentor, a web platform that connects users who need help with users who can offer help, based on their skills, interests, and goals. Project Mentor provides users with features such as user registration and profile creation, mentorship creation and joining, user rating and feedback, user reward and recognition, user matching and communication, and user donation and payment. With Project Mentor, users can enjoy a seamless and rewarding mentorship experience online.

MentorHub Features

MentorHub Features

User registration and profile creation

sign up and create their personal and professional profiles.

Mentorship creation

create and join mentorship programs or groups.

User rating and feedback

review their experiences with other users after each session.

User matching and communication

Get help based on profiles, preferences, and compatibility.

User reward and recognition

motivates users to participate by offering them rewards

User donation and payment

donate or receive money from other users.

User stories for MentorHub

As a User (Mentor/Mentee) I want to be able to register and create a profile

- User should enter their name, email, password, and other optional information to register on the website.
- In case user entered valid and unique information, create a new account for the user and send a confirmation email to their email address.
- In case user entered invalid or duplicate information, show a validation message “Please enter valid and unique information.”
- After registering, user should be able to edit their profile by adding their skills, interests, achievements, and other details.
- User should be able to view and browse other users’ profiles on the website.

As a User (Mentor/Mentee) I want to be able to login

- User should enter their email and password correctly to login to the website.
- In case user entered their email and password correctly, authenticate user and forward them to the last viewing page.
- In case user entered an incorrect email or password, show a validation message “You entered an incorrect email or password. Please try again.”
- In case user failed to login for the 3rd time, request user to show Captcha.
- In case the logging user is a mentor, redirect user to mentor dashboard. In case the logging user is a mentee, redirect user to mentee dashboard.

As a User (Mentor/Mentee) I want to be able to create and join mentorship programs or groups

- User should be able to see a list of available mentorship programs or groups on the website, filtered by categories, keywords, or ratings.
- User should be able to create a new mentorship program or group by providing a name, description, goals, and criteria for joining.
- User should be able to invite other users to join their mentorship program or group, or request to join other users' mentorship program or group.
- User should be able to accept or reject invitations or requests from other users to join their mentorship program or group.
- User should be able to leave or delete their mentorship program or group at any time.

As a User (Mentor/Mentee) I want to be able to search and browse for other users who need help or can offer help

- User should be able to enter keywords, categories, or filters to search for other users who match their criteria on the website.
- User should be able to see a list of search results, sorted by relevance, ratings, or distance, with brief information about each user, such as their name, profile picture, skills, interests, and availability.
- User should be able to click on any user to view their full profile, including their achievements, feedback, and ratings from other users.
- User should be able to save or bookmark any user they are interested in for future reference

As a User (Mentor/Mentee) I want to be able to communicate and schedule sessions

- User should be able to use the website's built-in tools, such as chat, voice, or video call, to communicate with other users during the session.
- User should be able to share their screen, files, or links with other users during the session.
- User should be able to use the website's built-in calendar, timer, or agenda to schedule and manage their sessions with other users.
- User should be able to rate the quality of the connection and the sound during the session, and report any issues or problems to the website.

As a User (Mentor/Mentee) I want to be able to give and receive feedback and ratings

- User should be able to rate and review their experience with other users after each session, using a scale of 1 to 5 stars and a text box for comments.
- User should be able to see the average rating and feedback of other users on their profile, and filter them by date, category, or keyword.
- User should be able to reply to or report any feedback they receive from other users on the website.
- User should be able to see how their rating and feedback affect their ranking and visibility on the website.

As a User (Mentor/Mentee) I want to be able to track and share my progress and achievements

- User should be able to see a dashboard of their progress and achievements on the website, such as the number of sessions they have completed, the hours they have spent, the skills they have learned or taught, and the goals they have achieved.
- User should be able to see a history of their sessions and feedback on the website, and filter them by date, category, or keyword.
- User should be able to generate and download a report or a certificate of their progress and achievements on the website, and share it with other users or external platforms, such as social media or email.

As a User (Mentor/Mentee) I want to be able to donate or receive donations

- User should be able to see a list of donation options on the website, such as the amount, the frequency, the recipient, and the purpose of the donation.
- User should be able to choose a donation option and enter their payment details on the website, using a secure and trusted payment gateway.
- User should be able to receive a confirmation and a receipt of their donation on the website or via email.
- User should be able to see a list of their donations and their impact on the website, and filter them by date, category, or keyword.

As a User (Mentor/Mentee) I want to be able to pay or receive payments

- User should be able to see a list of payment options on the website, such as the amount, the frequency, the recipient, and the purpose of the payment.
- User should be able to choose a payment option and enter their payment details on the website, using a secure and trusted payment gateway.
- User should be able to receive a confirmation and a receipt of their payment on the website or via email.
- User should be able to see a list of their payments and their impact on the website, and filter them by date, category, or keyword.
